

HC (high compression) = reduced throat size. XL2, L, L2, S cups only		Rim diameters do not change within a category: A Lotus 1XL has the same rim diameter as a Lotus 1M and 1XS.					We do not give rim diameter measurements because there is no industry standard position from which to measure. Comparisons are best we can offer. Input is welcome from the public to improve this chart.			
XL2, L, L2 = 3.9mm.		Cup sizes function like shirt sizes. XXL is biggest/deepest, XS is smallest/most shallow								
XL2HC, 1LHC, 1L2HC = 3.7mm.										
S = 3.8mm. SHC = 3.6mm.										
LOTUS	Bach	GR	Monette	Reeves	Schilke	Warburton	Yamaha
